Business Insights & Recommendations

Calculated live from the filtered data; nothing here is hardcoded.

PRODUCT SPENDING

Wines has the highest total spending at \$680,029.

Recommendation: Use the strongest observed product category as an evidence-based focus area when discussing product-level marketing opportunities.

PURCHASE CHANNEL

Store has the highest purchase volume with 12,959 purchases.

Recommendation: Prioritize analysis of the highest-volume purchase channel and compare its customer behaviour with the other available channels.

CAMPAIGN PERFORMANCE

Campaign 4 has the highest previous-campaign acceptance with 167 accepted customers (7.47%).

Recommendation: Use the observed campaign acceptance differences to identify which previous campaigns deserve closer analysis.

CUSTOMER SEGMENT

Segment 0 has the highest average spending at \$1,157 per customer.

Recommendation: Profile this segment's purchase and campaign behaviour before designing targeted customer strategies.

CAMPAIGN RESPONSE SEGMENT

Segment 0 has the highest latest-campaign response rate at 21.60%.

ENGAGEMENT RELATIONSHIP

Web visits and web purchases have a negative correlation of -0.06 in the filtered data.

Recommendation: Use the observed campaign acceptance differences to identify which previous campaigns deserve closer analysis.

CAMPAIGN RESPONSE SEGMENT

Segment 0 has the highest latest-campaign response rate at 21.60%.

Recommendation: Compare this segment's characteristics with other segments to understand patterns associated with campaign response.

CUSTOMER SEGMENT

Segment 0 has the highest average spending at \$1,157 per customer.

Recommendation: Profile this segment's purchase and campaign behaviour before designing targeted customer strategies.

ENGAGEMENT RELATIONSHIP

Web visits and web purchases have a negative correlation of -0.06 in the filtered data.

Recommendation: Treat this as an observed association, not proof that web visits cause purchases.

Dataset Limitations

This dataset does not contain advertising impressions, ad clicks, advertising cost, customer reach or advertising revenue. Therefore genuine CTR, advertising conversion rate and ROI cannot be calculated directly. The dashboard uses valid customer, purchase and campaign-response KPIs instead of inventing unavailable metrics.
